-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foerg (German Patent No. 346 719) in view of Ehrlich (U.S. Patent No. 4,187,996).

With respect to Claims 1-27, Foerg, Figures 1-2, teaches a vertically adjustable fixture adapted to be secured to an overhead surface, comprising a base member adapted to be secured to a surface, a flexible elongated member retractable in and extendable out of said base member, a rotatable reel provided in said base member with said elongated member being partly wound around said reel, and a locking mechanism provided in said base member and remotely of said reel, said locking mechanism being adapted in a locked position to lock said elongated member with respect to said base member, with said elongated member being selectively displaceable to disengage said locking mechanism to an unlocked position thereby allowing said elongated member to be displaced relative to said base member by selectively retracting said elongated member into, or withdrawing it from, said base member. Foerg teaches all the elements of the locking mechanism except for the locking mechanism being stationary. However, Ehrlich, Figure 4, teaches a stationary locking mechanism. It would have been obvious to one of ordinary skill in the art to provide Foerg with a stationary locking mechanism, as taught by Ehrlich, for the purpose of minimizing the number of moving parts in the apparatus thereby facilitating manufacturing.

With respect to Claims 28-30, the method described in these claims would inherently result from the use of the adjustable fixture of Foerg in view of Ehrlich as advanced above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
